The Fish Quiz

We believe that learning about fish should be fun. Therefore, we have designed a simple Fish Quiz that will help sharpen your eyes in recognizing fish, their environments and life styles.

Basically, the Fish Quiz asks whether you want to test your skills with fish biodiversity (habitats and life history traits), with adult fish pictures, with family pictograms, with fish larvae, or with fish sounds. It then creates a random list of respective pictures and offers multiple choices for the correct answer. We have kept these games very simple and have refrained from adding any time pressure or a hall of fame. You find the Fish Quiz by following the respective link in the header of the FishBase search page.

Mobile versions (Apps) of the biodiversity quiz are available in Play Store for Android devices and in the iTunes store for iPad and iPhone. The latter version also contains a fish identification game. In the stores, just search for: fish quiz fishbase.
